Navigation

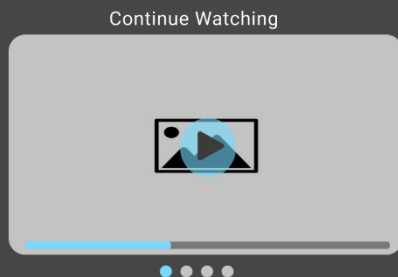

Section Header

Section dividers can be used to separate content with different headers. Do NOT use without header text.

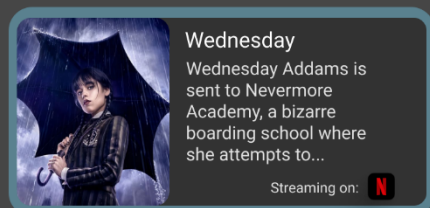

Buttons

Other elements

The continue watching element should only be used on the home screen.

The search result component should be used to display results when a user searched for a movie or series. The component must include an icon of the streaming service it is on

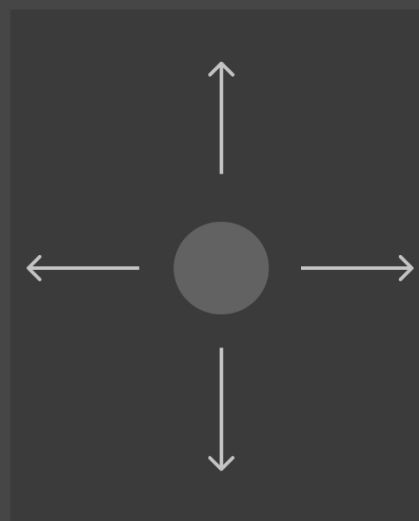

The sound component must only be used for the remote screen.

The search component may be used where a search function would be appropriate

The app layout should always include the icon as well as the name of the app for accessibility. If there are more apps that the user can swipe to see then an arrow should be added.

The remote joystick must only be used on the remote screen.
